

Cleaning boat procedures

1. Staff requirements:

- a. Staff MUST wear CLEAN clothes, a soft mask and gloves. Staff MUST change his/her clothes to CLEAN clothes after disinfecting boats, this mean all staff MUST have extra CLEAN clothes available for change at the marina. Having a clean change of clothes is responsibility of each STAFF. Keep all dirty clothes in a bag away from others. Do not keep your dirty clothes in lockers. **Lockers must be disinfected daily. Sharing of lockers is prohibited.**

2. Cleaning - tips:

- a. After gassing up and parking the boat, leave the boat untouched for at least an hour before cleaning.
- b. Discard all items left in the boat by guest (sunscreen, towels, etc...)
- c. Boat must be CLEAN first then disinfect.
- d. Use a disinfectant that has a drug identification number (DIN) like SANI/CIDE-RTU
DIN#02279789
- e. Avoid the use of spray bottles or pressurized sprayers that might aerosol contaminants.
- f. If commercial or household cleaning products are not readily available, you can prepare a bleach water solution with 20ml of unscented household bleach per 980 ml of water. When using the bleach and water solution, allow surface to air dry naturally. Make a fresh bleach solution each day.
- g. To avoid contaminating your cleaning solutions, do NOT re-dip dirty cloths backs in to the cleaning solution. Use clean cloths each time. This may require using a larger number of cloths than normal.
- h. If using paper towels and disposable wipes immediately discard after use.
- i. Floors should be kept visibly clean and free of spills, dust and debris.
- j. You must change gloves between cleaning boats.
- k. Life jackets:
Keep your soft mask on and put on a clean pair of gloves, steam clean all jackets (fabric items that cannot be laundered) or if available use a spray disinfectant on life jackets. Leave all life jackets outside as much as possible.
